

Part #4966 – Blue Focus & Strobe Light

- Blue light with focus and strobe abilities.
- Three modes: 1. Bright, 2. 50% Power, 3. Strobe.
- Strobe feature enables faster detection of UV leaks.
- Single powerful LED – effective for distances up to 20 feet.
- Made from anodized, aircraft-grade aluminum.
- 3 - AAA batteries included.

Operating Instructions:

- Unscrew cap at the bottom of the light and remove battery cartridge. Load batteries.
- Reinsert cartridge into battery chamber in the direction of cartridge arrow and screw on cap.
- Modes can be changed by pushing the black on/off button.
- To focus or widen beam – hold the light head and turn.

Battery Functionality & Replacement:

- Battery life depends on a variety of factors such as frequency of use, length of storage, mode type, battery quality, and environmental conditions.
- For optimum life, replace all 3 batteries at the same time.
- Compatible with all disposable and rechargeable 1.5V AAA batteries.
